DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a method for inhibiting the growth of cells in a blood vessel, said method comprising contacting said cells with a halichondrin analog.

Group II, claim(s) 12-17, drawn to a stent comprising a halichondrin analog coated on its surface.

Group III, claim(s) 18, drawn to a method for decreasing the risk of restenosis in a coronary artery or a bypass graft of a patient.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The above groups lack a common special technical feature that makes a contribution over the prior art. IS Pat. 6,653,341 disclose the compound of Group I, which appears to be the common technical feature between Groups I-III.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1618

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
